

CONTOURA COUNTER SYSTEM

Square Base Element-Curb Style

Project Name: _____
 Item: _____
 Quantity: _____
 Model: CS-SF-C
 Length: _____

DESCRIPTION:

Contoura is the progressive approach to counter design. Contoura is the innovative counter system that looks custom. Front panel material, finish and tray slide options are limited only to your imagination.

With technology-driven construction methods, it liberates you from the mundane details of counter construction, you are able to focus on the aesthetics and functional aspects — not construction techniques.

The designer can combine a series of bases, display components and buyout equipment to create meal centers. Configure, reconfigure and experiment with bold choices not boring details.
