

Deco Series Value Food Guard

BSI 

Quality and Value Are Not Mutually Exclusive

Image, design and merchandising are critical ingredients in today's food service environment. Our line of food shield will compliment any décor from traditional to contemporary. Our extensive catalog allows you to easily pick the food shield for you application or create your own design that meets your unique specifications and budgets. All our food shields are available in a variety of finishes including stainless steel, brass or our choice of powder coat colors.

Our state of the art design and manufacturing platform insures a perfect fit with your counter and, more importantly, total satisfaction with the finished product. These features combined with short lead times make our food shields today's leader in food shield fabrication.

Get What You Pay For

Our state of the art custom fabrication capabilities enable us to specialize in unique products. Our focus is to provide our customers high quality products at competitive prices within required lead times. We are one of a small number of fabricators who maintain a custom ETL electrical list, which allows us to document UL compliance on custom equipment.

In addition our products are manufactured to conform to NSF and UL standards, critical requirements in today's marketplace. Additionally, our nationwide teams of fully trained manufacturer's representatives insure local presence in your market place and a person who can meet directly with you to help with your food shield designs.

Regardless of what you're looking for, we can build it. To the left are three of our most popular food shields that compete on budget, but are unmatched in quality. In addition to those models we have hundreds of "catalog" food shields that offer value, quality and service suitable for any installation.
