

XGuard

The Only Fully 3-Way Adjustable Food Guard

BSI 

Raise Your Glass; Because We Just Raised the Bar

It's time to celebrate a new level of flexibility, control and freedom. Introducing the newest food guard from BSI : XGuard. It's the new standard for functionality and design.

When we introduced ZGuard years ago, we set the bar impossibly high by giving you the ability to move glass up and down a post while adjusting the angle 360°.

We just raised the bar again. Not only can you still move the glass panels up and down and change the angle of the glass, now you can move the glass back and forth more than 10 inches for an unprecedented level of control.

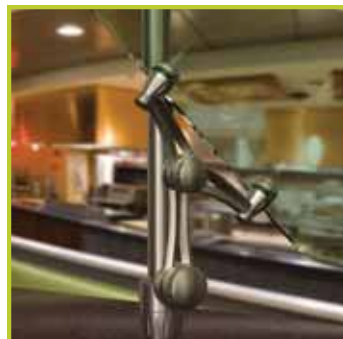

XGuard's revolutionary three-axis movement offers countless service configurations and design options. XGuard's third dimension puts customers where they belong—closer to the food.

A New Level Of Flexibility

XGuard's dramatic styling conveys an elegance, agility and forward-thinking design that takes your food guards from a "required" eyesore to a "must have" design feature.

XGuard looks great in any environment and complements any decor. Choose from hundreds of powder-coat colors to create a look that is uniquely yours.

To see more, give us a call and let us show you how XGuard lets you raise your glass and raise your expectations.

Self-Serve Neutral Position

Self-Serve Retracted Position

Self-Serve Partially Extended

Full-Serve Almost Fully Extended

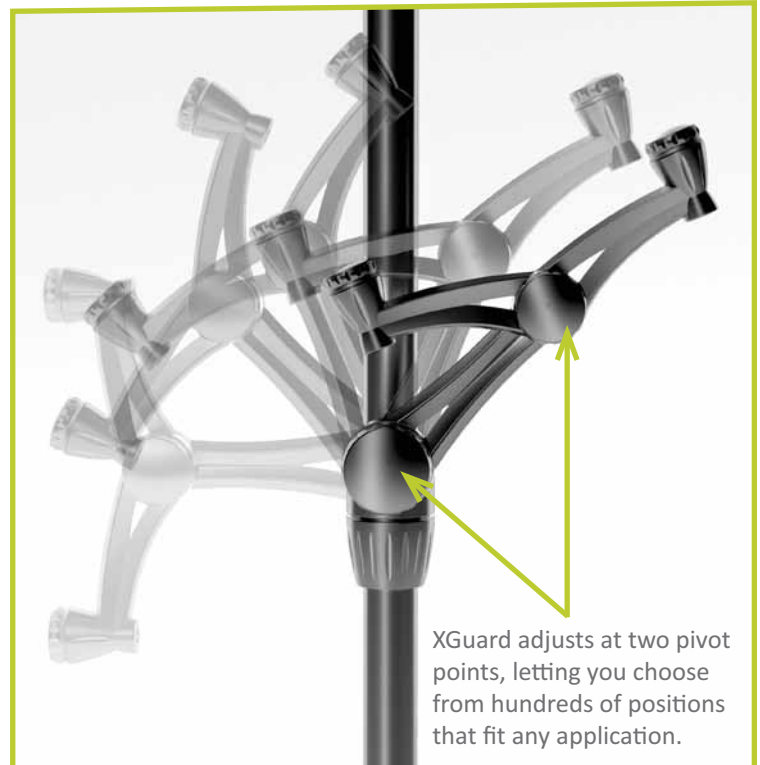

No Matter Your Application, We've Got You Covered.

From self-service to full-service, XGuard can be configured to meet any service situations.

CHOOSE FROM HUNDREDS OF COLORS AND FINISHES TO FIT ANY DECOR.

XGuard adjusts at two pivot points, letting you choose from hundreds of positions that fit any application.

XGuard Highlights

- Adjust glass back and forth up to 10 inches to easily meet local health codes while putting customers within reach of the food.
- Posts sit away from customers up to 4 inches, freeing up more counter space and put posts out of the way of the tray slide.
- Easily adjust glass angle with two ergonomic knobs to quickly go from self-serve to full-serve.
- Adjust height without knobs or tools to quickly comply with changing health codes.
- Shorter post barrel for a cleaner look. Grooved for easier grip.
- Glass is available in 1/4", 3/8" and 1/2" thicknesses.
- Glass can be rotated 360° for easy cleaning and maximum flexibility.
- Each section of glass can be moved independently to create side-by-side full-service and self-service stations.
- Easily create curved or serpentine layouts.
- Modular design is ideal for multi-phase renovations. Buy guards now and reuse later on new counters.
